Is Income Tredning Upwards in the United States?

As the shopping season approaches, the economists will project the amount of spending Americans will do for the holidays. One major factor that goes into that anlysis is the median income of the population. This inforgraohic groups each state based on their median household income. That beind said, this information can tell us a little bit about which states will most likely do the most shopping!

Median Household Income by State (2014)
