The Most Populated Cities in California

According to the latest reports and estimates by the U.S Census Bureau, we know how the populations of most states are distributed. Here are some of the more populated cities in California, with Los Angeles, San Diego ,San Jose and San Francisco topping the list. Los Angeles harbors around 10% of the total population of Los Angeles, while San Diego is home to only 3.5% of Californians. Despite these small percentages, Los Angeles is second most populated state in America, second only to New York City.
